Frontend-Focused Full-Stack Engineer | React, TypeScript, Node.js, REST API, GraphQL, SQL

TECHNICAL SKILLS

Core: TypeScript, JavaScript, React, Redux, Node.JS, GraphQL, REST API, Tailwind CSS, Jest

Working Knowledge: SQL, HTML/CSS, Express.JS, Spring Boot, MySQL, MongoDB, Docker, Figma, Jira

PROFESSIONAL EXPERIENCE

Software Engineer

Comcast / Xfinity

May 2021 – Present

- Build and maintain responsive, high-traffic e-commerce web experiences serving 100 million users/month; integrate REST/GraphQL APIs, implement client-side caching and optimistic UI updates to reduce latency and improve perceived performance.
- Partner with product, design, backend services, and QA across 100-engineer team ship features that drive conversion and retention, iterating in 2-week Agile sprints.
- Contribute to a 60% reduction in production incidents through systematic root-cause analysis and monitoring improvements; championing TDD and front-end best practices.
- Ensure WCAG 2.1 AA accessibility compliance: semantic HTML, ARIA, keyboard navigation, and manual accessibility testing.

Full Stack Developer

Y.I.K.E.S. Inc

Feb 2020 – Apr 2021

- Maintained and extended 3 client sites across CMS and custom web platforms; handled migrations, performance optimization, security hardening, backups, and staging/production deployments.
 - Programmed tests, performed code reviews, and triaged production issues reducing recurring defects for key accounts.
 - Collaborated with designers, content strategists, and account teams to deliver accessible, responsive, SEO-friendly templates.
-

PROJECTS

Insta-Photo

[\[GitHub\]](#) | [\[Video Demo\]](#)

Sep 2025 – Present

- Full-stack photo-sharing app built with React, Node.js and MySQL; support responsive feed, image upload pipeline, profile management, and interactive likes/comments.
- Implemented JWT-based authentication, server-side pagination, and cloud image storage

QR Code Generator

[\[GitHub\]](#) | [\[Live Demo\]](#)

Oct 2024 – Present

- Client-side QR Generator built with React and TypeScript; features real-time debounced previews, cross-browser support, and downloadable output.
 - Implemented URL sanitization and async VirusTotal-backed safety checks before QR code generating to prevent malicious link embedding.
-

KEY ACHIEVEMENT

Developed a smart AI assistant using Python, React, and TypeScript during a 1-week internal hackathon to guide users through product selection based on their needs.

The concept received positive feedback and was later prioritized as a formal product initiative.

EDUCATION

La Salle University

B.A. in Computer Science

Grad: May 2019

Academic Discovery Program Scholar – Selected as 1 of 15 recipients for a competitive 4-year scholarship covering partial tuition and some books for academic achievement and potential.

CyberSoft Academy

NodeJS Developer

July 2025 – Nov 2025
